

Superfire TH04, 2-in-1 LED headlamp / torch, 5W, 600lm, USB-C

Camping, mountaineering or perhaps a bike tour? For outdoor activities, you should equip yourself with a reliable light source.

Product number SUPERF-TH04

Weight 0.185kg

Product description

Camping, mountaineering or perhaps a bike tour? You should equip yourself with a reliable light source for outdoor activities. The SuperFire headlamp offers a total of 5 operating modes and achieves a brightness of up to 600 lumens. It is waterproof to IP44 and can withstand falls from a height of 1 metre. Despite its robust design, it weighs only 114 grams and does not put any strain on your head. If you remove the strap, you can also use the product as a hand lamp.

5operating modes

The SuperFire headlamp has 5 operating modes. The Low, Medium and Strong modes differ in brightness (from 116 lm to 600 lm), range (from 56 m to 127 m) and light intensity (from 784 cd to 4032 cd). The lamp also offers a flashing light in strobe mode and the option of activating an SOS light signal. This allows you to adapt the operation of the headlamp to the current situation - illuminate distant objects in strong mode or conveniently read the map in the dark in low mode. You can also effectively signal your presence to other road users and call for help in an emergency.

Lightweight and compact design

Weighing just 114 grams, you won't feel any weight on your head, even during prolonged use. The strap can be removed so that the TH04 model can be used not only as a headlamp but also as a hand lamp. This is particularly practical if you need to direct the light beam to a specific area or search for objects in dark corners of the garage or cellar.

Convenient one-handed operation

The practical button makes it easy to control the lamp. This means you can operate the device with one hand without having to take off your gloves in low temperatures.

Ready for use

With the SuperFire, you are perfectly equipped for a weekend outdoors. The USB-C port enables convenient charging. The device displays the battery status - red light when charging and blue light when fully charged. In low mode, the maximum operating time of the TH04 model is 15 hours.

Robust construction

Harsh weather conditions are no problem for the SuperFire lamp. It is waterproof to IP44 and can therefore be used in the rain without hesitation. Thanks to its solid construction, the TH04 model can also withstand falls from a height of 1 metre.

Scope of delivery

- Superfire TH04 headlamp
- USB-C charging cable
- User manual
- 18650 rechargeable battery
