

Raspberry Pi stainless steel drinking bottle

Many of us Raspberry Pi fans live by the motto "EAT. SLEEP. CODE. REPEAT". And as laudable as that is, you shouldn't dehydrate yourself in the process. So if you want to add the healthy "DRINK" to your LOOP, this drink is for you

Product number RPI-BOTTLE

Weight 0.226kg

Product description

Many of us Raspberry Pi fans live by the motto "EAT. SLEEP. CODE. REPEAT". And as laudable as that is, you shouldn't dehydrate yourself in the process. So if you want to add the healthy "DRINK" to your LOOP, this drinking bottle in Pi design is just the thing for you.

This is a double-walled 375 ml bottle made of stainless steel with a screw cap made of PP rubber and plastic. The body of the bottle is matt black and the classic Raspberry Pi logo is laser engraved on the side. It is slim enough to be carried in most bags.

Wash with soapy water before use and regularly afterwards. Not suitable for microwave or dishwasher

The bottle is BPA and PVC free and can be used for both hot and cold drinks.

It is compatible with all liquids without driver installation. However, for best performance, we recommend filling the bottle with water.

Product properties

Country of Origin Great Britain

VPE 1 / 40

Product ID RPI-BOTTLE

Manufacturer ID SC0924

Gross Weight (kg) 0.226

Zolltarifnummer 96170000

Brand Raspberry Pi
