Product description

Whadda Mini peristaltic pump, 6 V

The Whadda Mini peristaltic pump offers a precise solution for pumping liquids and is ideal for applications in laboratories, medical devices and dosing systems. It operates at 6 VDC, with a flow rate of at least 39 ml/min and a service life of over 200 hours. Thanks to the self-priming function, no prior filling is necessary, which makes the pump very versatile.

The pump is quiet and low-maintenance, with a noise level of less than 40 dB. As the liquid only comes into contact with the silicone hose, contamination is avoided, making it suitable for clean and hygienic applications. This module is not designed for contact with food and is only suitable for technical liquids.

Features at a glance

- Self-priming for flexible application options
- Low-maintenance design
- Low noise with < 40 dB
- Service life of the silicone hoses: over 200 hours
- Flow rate: at least 39 ml/min

Compatibility

- Suitable for laboratory applications, dosing systems and medical devices

Technical specifications

- Power supply: 6 VDC / 5 W
- Dimensions: 65 x 40 mm
- Weight: 95 g
- Silicone tube dimensions: 2.0 x 4.0 mm

Other data

- Colour: Grey, additional colours: Blue
- Maximum volume: < 40 dB

Scope of delivery

- 1x Whadda Mini peristaltic pump
